In the Claims

Claims 1-9 (canceled)

10. (currently amended) The hand-held wireless telecommunications unit of Claim 36 ~~[[7]]~~ wherein said telecommunications unit is a cellular telephone.

11. (currently amended) The hand held wireless telecommunications unit of Claim 36 ~~[[7]]~~ wherein said telecommunications unit is a wireless personal digital assistant.

12. (currently amended) The hand-held wireless telecommunications unit of Claim 36 ~~[[7]]~~ wherein said telecommunications unit is wireless Internet Web based personal electronic organizer.

13. (currently amended) The hand-held wireless telecommunications unit of Claim 36 ~~[[7]]~~ wherein said screens are LCD's.

14-19. (canceled)

20. (currently amended) The hand-held wireless telecommunications unit of Claim 36 ~~[[7]]~~ wherein said first screen is powered by a first driver electronics circuitry controlled by imaging software and said second ~~at least one additional~~ screen is powered by a separate driver electronics circuitry controlled by imaging software.

21. (currently amended) The hand-held wireless telecommunications unit of Claim 36 ~~[[7]]~~ wherein said first and second ~~said at least one additional~~ screens are both powered by a common driver electronics circuitry controlled by imaging software.

22. (currently amended) The hand-held wireless telecommunications unit of Claim 36 ~~[[7]]~~ wherein said first screen displays a first image powered by a first driver electronics circuitry controlled by imaging software and said second ~~at least one additional~~ screen displays a second image powered by a second driver electronics circuitry controlled by imaging software.

23. (currently amended) The hand-held wireless telecommunication unit of Claim 36 ~~[[7]]~~ wherein said first and second ~~at least one additional~~ screens display respective portions of a single image.

24. (canceled)

25. (currently amended) The hand-held wireless telecommunication unit of Claim 36 ~~[[7]]~~ having additional screens nested under said second screen wherein said at least one additional screen comprises a plurality of screens.

26. (currently amended) The hand-held wireless telecommunication unit of Claim 36 ~~[[7]]~~ wherein a third said at least one additional screen is nested under said second screen and deployable to an opposite side comprises at least one screen attached to a left side of said first screen and at least one screen attached to a right side of said first screen.

27. (currently amended) The hand-held wireless telecommunication unit of Claim 36 ~~[[7]]~~ wherein a third screen is nested under said second screen deployable past a distal side of said second screen when deployed, all of said screens forming a continuous display for a full width of an SVGA display said at least one additional screen comprises a plurality of screens attached to a left side of said first screen and a plurality of screens attached to a right side of said first screen.

28. (currently amended) A hand-held wireless telecommunications unit displaying images to a user, comprising:

a hand-held body having a keypad;

a display on an upper face of said body comprising a first screen having a side-to-side axis;

a second screen slidable outwardly ~~outward axially~~ along said side-to-side axis of said first screen along tracks mounted on upper and lower edges of said first screen, said second screen being movable between a first position wherein said second screen is nested under said first screen and a second deployed position wherein said second screen forms a continuous screen with said first screen; and

a third at least one further screen slidable outwardly ~~outward axially~~ along said side-to-side axis of said first screen on ~~along~~ tracks mounted on upper and lower edges of said second screen, all of said screens when fully deployed together providing a full width of an SVGA display, said third at least one further screen being movable between a first position wherein said third at least one further screen is nested under said first and second screens and a further deployed position wherein said first, second and third ~~said at least one further~~ screens form a continuous screen~~[[.]]~~ ; and

means for deploying said screens using only one hand of a user in one sweeping motion.

29. (currently amended) The hand-held wireless telecommunications unit of Claim 28 having a grasping handle extending from a distal edge of said third screen accessible when said second and third ~~said at least one further~~ screens are nested under said first screen for pulling said second and third ~~said at least one further~~ screens outwardly to form said continuous screen.

30 (previously presented) The hand-held wireless telecommunications unit of Claim 29 wherein said telecommunications unit is a cellular telephone.

31. (previously presented) The hand held wireless telecommunications unit of Claim 29 wherein said telecommunications unit is a wireless personal digital assistant.

32. (previously presented) The hand-held wireless telecommunications unit of Claim 29 wherein said telecommunications unit is wireless Internet Web based personal electronic organizer.

33. (previously presented) The hand-held wireless telecommunications unit of Claim 29 wherein said screens are LCD's.

34-35. (canceled)

36. (new) A hand-held wireless telecommunications unit displaying images to a user, comprising:

a hand-held body having a keypad;

a first screen on an upper face of said body having upper and lower edges, and first and second sides bounding a width of said display;

at least one second screen nested under said first screen slidable outwardly past one of said sides of said first screen on tracks mounted on said upper and lower edges of said first screen, said at least one second screen being movable between a first position under said first screen and second deployed position wherein said at least one second screen is off to a side of said first screen to form a continuous screen with said first screen for a full width of an SVGA display; and

means comprising a grasping handle extending from a distal edge of said second screen accessible when said second screen is stored under said first screen for pulling said

at least one second screen from said first position to said second deployed position in one sweeping motion.

37. The hand held wireless telecommunications unit displaying images to a user as in Claim 37 wherein said at least one second screen is a plurality of further screens, each said further screen slidable on said tracks,
wherein said first, second and further screens nesting together when retracted after use.
